The DETANGLE Brief #3

Join the First DETANGLE Online Workshop!

Three workshops. Three perspectives. One goal - Understanding EU Cybersecurity Regulations.

We are launching the Online Workshop Series, *"Untangling EU Cybersecurity Regulations,"* bringing together legal, cybersecurity, compliance and policy perspectives to explore the complexities of European cybersecurity legislation.

Across three expert-led sessions, we will examine how NIS2 is being implemented across EU Member States, how different EU digital regulations intersect, and how national authorities approach cybersecurity supervision and enforcement.

The series kicks off this Thursday, 29 October 2026, and we invite you to join us!

29.10. | Workshop 1

The NIS2 Patchwork – A Comparative Perspective Across EU Member States

The NIS2 Directive aims to establish a high common level of cybersecurity across the European Union. However, its transposition into national legislation has resulted in different regulatory approaches, creating challenges for organisations operating in multiple Member States.

This workshop will explore how selected EU countries have implemented NIS2, focusing on differences in national legal frameworks, competent authorities, compliance obligations and enforcement strategies.

Key topics include:

- The state of NIS2 transposition across EU Member States
- Differences in national implementation approaches
- National competent authorities and enforcement mechanisms
- Incident reporting requirements and executive liability

Participants will gain a comparative understanding of the NIS2 implementation landscape and the challenges associated with cross-border compliance.
