The DETANGLE Brief #4

Thank You for Joining the First DETANGLE Workshop!

Thank you to everyone who joined us last week for the first workshop in the DETANGLE Online Workshop Series, “Untangling EU Cybersecurity Regulations.”

The workshop recording is now available on d.LAB, DETANGLE's knowledge-sharing and capacity-building platform.

Recording: Workshop NIS2 Patchwork

We invite you to continue exploring the complexities of EU cybersecurity legislation with Valerio Lubello. Make sure you register for the upcoming sessions!

19.11. | Workshop 2

Intersections Between AI Act, GDPR, CRA, and NIS2

Following our first discussion on NIS2 implementation across Member States, the second workshop will explore another important challenge: **how different EU digital regulations interact and what their overlapping requirements mean for organisations.**

The GDPR, AI Act, Cyber Resilience Act and NIS2 Directive each address different aspects of digital governance, security and resilience. However, their requirements often intersect, raising important questions about compliance, accountability and regulatory coordination.

Join Valerio Lubello for an expert-led session exploring:

- **Regulatory intersections:** How the AI Act, GDPR, CRA and NIS2 relate to one another
- **Overlapping obligations:** Where different compliance requirements intersect and potential conflicts arise
- **Incident reporting and data governance:** Understanding the relationships between cybersecurity and data protection obligations

- **Organisational accountability:** Examining the implications of multiple regulatory frameworks for organisations.

📅 19 November 2026 | 11:00 CET

Whether you joined our first workshop or are discovering the series for the first time, we invite you to continue exploring the complexities of EU cybersecurity legislation with us.

Register for the second Workshop

10.12. | Workshop 3

Comparing NIS2 Competent Authorities

The DETANGLE Online Workshop Series with Valerio Lubello will conclude on **10 December 2026** with its third session:

"Comparing NIS2 Competent Authorities: Supervisory Models and Enforcement Powers Across EU Member States."

This workshop will examine how national cybersecurity authorities approach supervision, inspections, audits and enforcement under

NIS2.
